## 2. THE BUSINESS

### 2.1 PLAN SUMMARY

---

#### 2.1.1 WHAT OUR BUSINESS DOES

Provide AI solutions to small-medium enterprises in Perth, WA, to help in the adaptation and to aid in the inefficiency gap. We offer Artificial Intelligence solutions to Small-Medium Enterprises (SMEs) in Perth, Western Australia. Our goal is to close the gap created by operational inefficiencies.

#### 2.1.2 OUR TARGET MARKET

The primary target market consists of service-based SMEs with 5-50 employees located in South Perth and surrounding suburbs, including Applecross, Como, Victoria Park, and Kensington. Key industries include trades, retail, hospitality, professional services, and property management.<sup>1</sup>

#### 2.1.3 OUR UNIQUE SELLING POINT / FEATURES AND BENEFITS

The core value proposition is:

- Enterprise AI capability at startup pricing
- Good AI Australia differentiates itself by offering a 'fury'
- PRIS compliant AI voice agent service at a 50-67% price point than custom solutions, with 'Better, more nuanced, emotive voice.' through a highly efficient, template-based delivery model.

#### 2.1.4 OUR BUSINESS GOALS

The primary goal for the first year of operation is to acquire 60 clients, achieving a monthly recurring revenue (MRR) of \$15,000-\$20,000 by Month 12. The long-term goal is to establish Good AI Australia as the leading provider of accessible AI solutions for the WA SME market.<sup>1</sup>

## 2.1.5 OUR HISTORY

The business is founded by Kevin Tan, a certified prompt engineer with credentials placing him in the top 0.8% of his field. The founder has successfully developed and deployed five proof-of-concept AI voice agents, demonstrating tangible value creation for clients in the range of \$45,000–\$75,000 annually.<sup>1</sup>

## 2.2 OUR WHY

---

**Good AI Australia** was founded based on the clear recognition of **the rapid global change**, particularly in the context of Perth, Western Australia. The founder's local knowledge of Perth, combined with a forecast made nearly a year ago—now being validated by researchers—highlighted a significant market failure: Perth's deep-seated adversity to change.

The rapidly accelerating development of AI presents a critical challenge: **if Perth remains static**, it risks being severely **left behind within the next five years**. This lag, combined with **a rising cost of living, a housing crisis, unfavourable tax policies** (unless your big mining) and the inevitable **global job overhaul**, risks pushing Western Australia toward a 'third world' state (in comparison to future advances) and the younger generations closer to the poverty line.

With the knowledge of advanced prompt engineering and a deep understanding of AI model capabilities, the founder recognized that for many SME use cases, a fully bespoke agent is unnecessary. Businesses in Western Australia often operate with a **"see-to-believe"** mentality, and many adhere to the principle of **"if it's not broken, don't fix it."** To encourage their adoption of new methods, you must **introduce them to this new era gently**. Start with the simplest tools that offer the most visible and significant results.

## 2.3 OUR VISION

---

Leveraging the advanced knowledge and tools available to our generation, we will **equip the willing, educate the ignorant, and aid the weak**. Rising as one to solve our long-overdue systemic issues, close the gap, reform positively, and evolve past violence and greed.

## 2.4 OUR MISSION (BENEFIT STATEMENT)

---

Our core commitment is to enable all willing individuals to **fully utilize AI's potential, preparing them for the forthcoming era**. This age is anticipated to begin with a period of turbulence and potential unrest, eventually transitioning into a long duration of stability economically and dream-like advancements. During this time of change, solutions will be developed and implemented swiftly, addressing challenges as they emerge. By adopting this methodical approach, we aim to have tools at the ready and systematically **create solutions faster than the problems** appear.

## 2.5 OPERATIONS

---

### 2.5.1 PRODUCTS AND SERVICES (REVENUE STREAMS)

Good AI Australia's revenue is generated through a combination of one-time setup fees and recurring monthly subscriptions for its template-based AI voice agents, supplemented by premium consulting and custom development services. These are 24-7 emotive, intelligent agents powered by the latest cutting-edge models (Chatgpt & Gemini) with the ability to look at your calendar, schedule meetings – all customized to your preferences. (Give Good AI a call and test it out . +61877414191)

All subscriptions are variable to change dependent on the minutes consumed by the business using our voice agents.

Additional minutes will be automatically charged unless specifically directed to cut off the service when limit is reached.

| Product/service                                                                            | Description                                                                                                        | Setup   Subscription |

### 2.5.1A DIFFERENTIATORS

- **PRIS Act 2026/2027 Compliant** – All our services are built 100% PRIS Compliant unlike our competitors
- **HD Voice quality guaranteed on WA Infrastructure**
- **Grant Ready Solution** – Aligned with Government Digital Grant's.

\$199–399 per month for 24–7 assistance? Or \$60k + per year with annual leave and sickdays?

### 2.5.1B NEXT SERVICES TO DEPLOY:

- **Data cleaning SaaS**
- **Tiered chatbots for various businesses use cases**
- **Branding and web development, digital content.**
- **Video advertisements**
- **Business Automation and Solutions**
- **Content creation and workshops.**
- **Affiliate marketing**

### 2.5.2 PRODUCTION (KEY ACTIONS)

The operational cornerstone of Good AI Australia is its highly efficient, standardized service delivery model, designed to deploy a fully functional AI voice agent for a client in just one hour of founder time.<sup>1</sup> This process is broken down into **three key stages**:

1. **Client Onboarding (15 minutes client time, automated):**

Upon selecting a template, the client receives an automated **welcome email** with a **link to a Google Form**. This form collects all necessary business details (e.g., hours, departments, key contacts, specific call routing instructions). The client also receives a link to a **10-minute video tutorial** explaining the system's functionality.

2. **Founder Configuration (30 minutes founder time):**

The founder clones the **chosen propriety template** within the voice platform's dashboard. The client's specific business details from the Google Form are then **embedded into the voice agent's knowledge base**. A series of three **test calls are conducted to ensure functionality** before sending a test link to the **client for their review**.

3. **Activation Call (30 minutes founder time):**

A live call is scheduled with the client. During this call, the client's existing **business phone number is connected** to the AI agent platform. The founder provides a brief walkthrough of the client dashboard, demonstrating how to access call logs and messages. **A final live test call is conducted** with the client to confirm satisfaction before the service is formally activated.

This "build once, deploy many" approach is what allows the business to drastically undercut the time and cost of custom development, which typically requires weeks of discovery, development, and testing for each individual client.

### **2.5.3 SALES AND DISTRIBUTION CHANNELS (CHANNELS)**

| Channel                                 | Used for                                           | Details                                                                                                                                                                                                                        |
|-----------------------------------------|----------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Direct Outreach &amp; Networking</b> | Primary client acquisition.                        | Actively participating in local business networking events in the target suburbs (South Perth, Como, etc.). Direct, personalized outreach to businesses in target industries (e.g., trades, property management).              |
| <b>Website (goodai.au)</b>              | Inbound lead generation and product demonstration. | The website will serve as the primary digital storefront, featuring detailed descriptions of each template, video demonstrations, clear pricing, and a simple contact/onboarding form with eventually showcase live.           |
| <b>Referral Program</b>                 | Leveraging existing client base for growth.        | A formal referral program will be established, offering a one-month service credit to existing clients for each new customer they refer. This is designed to capitalize on the "tell your friends" Pricing model. <sup>1</sup> |
| <b>Local SEO</b>                        | Capturing local search intent.                     | Optimizing the website and a Google Business Profile for search terms like "AI voice agent Perth," "affordable chatbot for small business WA," to attract businesses actively seeking solutions.                               |
| <b>Social media</b>                     | Linkedin<br>Meta<br>Google                         | The standard for any business today. If lacking in online presence, outsource as it is a necessity.                                                                                                                            |

## 2.5.4 DIGITAL TECHNOLOGY

A critical component of the business plan is the selection of a robust, scalable, and cost-effective technology stack. "Trellit.ai" reached out to the founder impressed at his prompt engineering work and offered partnership, which gives him cost price if he hit's a certain quota per month.

The business's success hinges on a platform that is not only technologically capable but also financially viable under a pay-per-use model.

|                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                 |

|             | Difficult onboarding, early stages of company, no manual, no guides, no best practices. |
|             | Recommendation for Good AI                                                              |
|             | Deliver exceptional, value-added services that establish our role as a genuine partner. |

### 2.5.4B TECHNOLOGY CONTINGENCY PLAN:

The architecture of the AI agents will be platform-agnostic. This means the core logic and conversation flows will be designed in a way that allows for migration to an alternative platform (such as Bland.ai or a future competitor) within an estimated 2–4-week timeframe if Vapi.ai's pricing, performance, or service becomes untenable.<sup>1</sup> This mitigates the risk of platform dependency.

### 2.5.5 INFORMATION MANAGEMENT

Customer information (business details, contact information, call routing rules) will be collected via secure Google Forms and stored in a dedicated Google Workspace account. Call logs and transcripts generated by the AI agent platform will be stored securely on the platform's Australian-hosted servers. All data management practices will be designed with the principles of the upcoming *Privacy and Responsible Information Sharing Act 2024 (WA)* in mind, ensuring data minimization, security, and client confidentiality.<sup>1</sup> Regular data backups will be managed by the cloud service providers (Google, Vapi.ai).

## 2.5.6 CUSTOMER RELATIONS (CUSTOMER RELATIONS)

A proactive and supportive customer relationship model is key to retention and referrals.

| Method                                  | Frequency       | Purpose                                                                                                                                                          |
|-----------------------------------------|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Onboarding &amp; Activation Call</b> | Once per client | To ensure a smooth and positive start, build initial rapport, and confirm the client is comfortable with the technology.                                         |
| <b>Proactive 30-Day Check-in</b>        | Once per client | A follow-up call or email one-month post-launch to review performance, answer questions, and identify any potential optimization opportunities.                  |
| <b>Quarterly Performance Summary</b>    | Quarterly       | An automated email summarizing key metrics (e.g., calls handled, average duration) to demonstrate ongoing value and ROI.                                         |
| <b>Direct Support Channel</b>           | As needed       | Clients will have direct email and phone access to the founder for any technical support or change requests, reinforcing the value of local, accessible support. |

## 2.6 ASSETS AND KEY RESOURCES (KEY RESOURCES)

The primary asset of the business is the intellectual property embodied in the five pre-built AI voice agent templates. These templates represent approximately 70 hours of specialized development work and are the core enabler of the business's rapid deployment model.<sup>1</sup>

| Equipment                     | Owned                                         | Cost (\$)            |
|-------------------------------|-----------------------------------------------|----------------------|
| High-Performance Laptop       | Not necessity but highly inconvenient without | \$2,500              |
| High-performance workstation  | \$2000                                        | \$3000               |
| Business Smartphone           | \$120 per month currently                     | \$60 per month [50%] |
| Office Monitor & Peripherals  | \$1,500                                       | Required if scaling  |
| Website Development & Hosting | \$100 (Hosting)<br>for professional \$3000    | \$1,000              |
| Business Registration & Legal | To be purchased (Startup Cost)                | \$1600               |

|                                           |                          |                       |
|-------------------------------------------|--------------------------|-----------------------|
| <b>Relevant AI subscriptions (Annual)</b> | Currently paying monthly | \$1600 annual payment |
| <b>Total Startup Equipment/Costs</b>      |                          | <b>~ \$11,000</b>     |

## 2.7 INTELLECTUAL PROPERTY

The core intellectual property (IP) of Good AI Australia consists of the five proprietary AI voice agent templates. While the underlying AI platforms (e.g., Vapi.ai) are third-party, the specific design, conversation flows, prompt engineering, and integration logic of each template are the unique creation of the business. The business name "Good AI Australia" and the domain "goodai.au" will be registered. While a formal trademark for the business name is not an immediate priority, it will be considered in Year 2 as the brand gains market recognition. Copyright protection automatically applies to the unique content created for the website and marketing materials.

|                                    |                          | <b>Objective:</b> Accelerate the implementation of the founders' architectural designs.                                                                          |

2.8.2 SOURCES OF ADVICE AND SUPPORT

| Support type        | Name                                | Skills and experience                                                                                                   |
|---------------------|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| Business Mentorship | Self-Employment Assistance Provider | Access to experienced business mentors through the SEA program to provide guidance on strategy, growth, and compliance. |

|                               |                                  |                                                                                                                                                                              |
|-------------------------------|----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Accounting &amp; Legal</b> | Local Perth Firm (To be engaged) | A local accounting firm will be engaged for bookkeeping, tax compliance (BAS, income tax), and general financial advice. Legal advice will be sought for service agreements. |
| <b>Technology Partner</b>     | Trellit.ai                       | Access to the platform's technical documentation and community support channels (e.g., Discord) for resolving technical issues. <sup>7</sup>                                 |
| <b>Technology partner.</b>    | Reset data.                      | Sovereign AI platform partner by Nvidia.                                                                                                                                     |

### 2.8.3 SKILL AND STAFF RETENTION STRATEGIES

As a sole trader, the primary focus is on maintaining the founder's leading-edge skills. A dedicated budget of \$150 per month (\$1,800 annually) is allocated for professional development.<sup>1</sup> This includes subscriptions to AI research journals, enrolment in advanced AI development courses, and attendance at relevant industry webinars and conferences. This commitment ensures that the business's technical offerings remain current and competitive in the rapidly evolving AI landscape.

## 3. THE MARKET

## 3.1 THE PROBLEM

---

Perth's small and medium-sized enterprises are caught in a difficult position. They understand the competitive necessity of adopting new technologies like AI to improve customer service and operational efficiency. However, the current market for AI solutions in Perth is bifurcated, offering only two impractical choices for the average SME. The first is engaging a local digital agency for a custom-built AI voice agent, a process that is prohibitively expensive (typically \$5,000–\$15,000 setup) and slow (8–12 weeks deployment). The second is attempting to use a complex, do-it-yourself (DIY) developer platform, which requires significant technical expertise, time, and resources that a typical small business owner does not possess. This leaves a vast segment of the market underserved, needing a solution that is both affordable and fully managed.

## 3.2 OUR SOLUTION, FEATURES AND BENEFITS (VALUE PROPOSITION)

---

Good AI Australia provides the ideal "middle-ground" solution that directly addresses the market's service model gap. By using a template-based approach, the business delivers a productized service that combines the affordability of a SaaS tool with the hands-on support of a local agency.

The value proposition is built on **five key pillars**:

1. **Affordability**: By eliminating 95% of the custom development time, setup costs are reduced by 62–95% compared to local agencies. Monthly subscriptions range from \$149 for micro-businesses to \$599 for fully customized solutions—all with PRIS compliance built in.
2. **Speed**: Deployment is completed within 48 hours of the client providing their business information, allowing them to see a return on investment almost immediately.
3. **Simplicity**: Clients do not need any technical knowledge. They choose a template that fits their business needs, provide their information via a simple

onboarding form, and the rest is handled for them—including integration with their existing phone systems and business tools.

- 4. **Local Support:** Unlike faceless international DIY platforms, clients have a direct line to a Perth-based expert for support, questions, and modifications. This includes ongoing prompt optimization and technical troubleshooting.
- 5. **Futureproofing:** The solutions are built with data privacy and security as a priority, aligning with the principles of upcoming WA legislation (PRIS Act 2026/2027) to ensure clients are prepared for future regulatory requirements. All customer data is hosted in Australian data centres with full GDPR-equivalent protections.

### 3.3 OUR TARGET MARKET (CUSTOMER SEGMENT)

The primary target market is service-oriented SMEs with 1–50 employees located in the South Perth metropolitan area and adjacent suburbs like Applecross, Como, Victoria Park, and Kensington. These businesses are typically owner-operated, time-poor, and highly sensitive to price, yet they rely on constant phone communication for bookings, inquiries, and customer support. The identified market size includes 220,000 SMEs in Western Australia, with an estimated 50,000 being "AI-adoption-ready".

|                  |                                                              |
|------------------|--------------------------------------------------------------|
| Customer Persona | Mr. Nothing’s broken why fix it                              |
| Age group        | 40–60                                                        |
| Profession       | Owner of a local trade business (e.g., plumbing, electrical) |

|                        |                                                                                                                                                                                           |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Annual Income</b>   | \$80,000 - \$150,000                                                                                                                                                                      |
| <b>Education level</b> | TAFE qualification / Apprenticeship                                                                                                                                                       |
| <b>Family Status</b>   | Married with children                                                                                                                                                                     |
| <b>Psychographics</b>  |                                                                                                                                                                                           |
| <b>Lifestyle</b>       | Busy, works long hours, values practicality and reliability.                                                                                                                              |
| <b>Goals</b>           | Grow the business, spend less time on administrative tasks, improve customer response times, have more time for family.                                                                   |
| <b>Pain points</b>     | Missed calls from potential clients while on a job, spending evenings returning calls and booking appointments, frustration with high-cost technology solutions that seem overly complex. |
| <b>Spending habits</b> | Cautious, looks for clear ROI, prefers predictable monthly costs over large capital outlays.                                                                                              |
| <b>Values</b>          | Honesty, reliability, supporting other local businesses.                                                                                                                                  |
| <b>Geographic</b>      |                                                                                                                                                                                           |

|                                    |                                                                                                                                            |
|------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| <b>City</b>                        | Perth                                                                                                                                      |
| <b>Area</b>                        | South Perth, Victoria Park, Como                                                                                                           |
| <b>Behavioural</b>                 | Habitual, no surprises, all control                                                                                                        |
| <b>Product Usage</b>               | Uses a smartphone for almost all business communication. Familiar with basic apps and social media (Facebook) but not a technology expert. |
| <b>Primary Social media Source</b> | Facebook community groups, industry forums.                                                                                                |

### 3.3.1 SECONDARY SEGMENT: MICRO-BUSINESSES & SOLE TRADERS

A significant secondary segment consists of micro-businesses (1–3 employees) and sole traders who need basic call answering but cannot justify \$200+ monthly costs. This segment includes mobile tradies, personal trainers, consultants, beauty therapists, and home-based service providers. They prioritize affordability and simplicity, making them ideal candidates for the new **Business Starter** tier.

## 3.4 ADVERTISING AND PROMOTION (CHANNELS)

---

| Channel                          | Used for                                       | Details                                                                                                                                                              |
|----------------------------------|------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Local Business Networking</b> | Building trust and generating initial clients. | Attending events hosted by local Chambers of Commerce and BNI (Business Network International) chapters in the target geographic area.                               |
| <b>Google Ads (Local)</b>        | Capturing high-intent leads.                   | Running targeted search campaigns for keywords like "Perth business answering service," "AI for tradesmen WA," with a daily budget focused on the specified suburbs. |
| <b>Website &amp; SEO</b>         | Establishing credibility and organic reach.    | The website will feature case studies and video demos. SEO efforts will focus on ranking for local service-based keywords to attract organic traffic.                |
| <b>Client Referrals</b>          | Driving low-cost, high-trust growth.           | Implementing a "first month free" incentive for existing clients who refer a new customer, encouraging word-of-mouth marketing.                                      |
| <b>Facebook Community Groups</b> | Direct engagement with target persona          | Active participation in local Perth business groups (South Perth Business Forum, Perth Tradies Network) with                                                         |

|  |                                                                       |
|--|-----------------------------------------------------------------------|
|  | educational content about AI adoption and grant funding opportunities |
|--|-----------------------------------------------------------------------|

### 3.5 THE COMPETITION

The competitive landscape in Perth is not defined by direct, like-for-like competitors, but by a spectrum of different service models. Good AI Australia is uniquely positioned within a significant service model gap.

| Competitor                                   | AI Agency Perth                                                                                                                                                            | Dilate Digital Perth                                                                                                                                    | GreenDaisy AI                                                                                                 | D.I.Y Platforms                                                                                                                                 |
|----------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Validated Service Model &amp; Pricing</b> | Fully custom AI voice agents <ul style="list-style-type: none"> <li>• Setup: \$5,000–\$15,000</li> <li>• Monthly: \$500–\$2,000</li> <li>• Timeline: 8–12 weeks</li> </ul> | Full-service digital agency offering AI as add-on <ul style="list-style-type: none"> <li>• Setup: \$1,000+</li> <li>• Monthly: \$300–\$1,000</li> </ul> | Basic automation tool <ul style="list-style-type: none"> <li>• Setup: \$0</li> <li>• Monthly: \$47</li> </ul> | DIY developer platforms <ul style="list-style-type: none"> <li>• Setup: \$0</li> <li>• Monthly: \$0.09/min (~\$270/mo at 5,000 mins)</li> </ul> |
| <b>Key Strengths</b>                         | <ul style="list-style-type: none"> <li>• Deep customization</li> <li>• Enterprise-grade features</li> </ul>                                                                | Local Perth presence <ul style="list-style-type: none"> <li>• Bundled marketing + AI services</li> </ul>                                                | Extremely low cost <ul style="list-style-type: none"> <li>• Simple setup</li> </ul>                           | Advanced technical capabilities                                                                                                                 |

|                       |                                                                                                                                                               |                                                                                                                                                       |                                                                                                                                                                              |                                                                                                                                                   |
|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Key Weaknesses</b> | <ul style="list-style-type: none"> <li>• Established reputation</li> </ul>                                                                                    | <ul style="list-style-type: none"> <li>• Trusted brand</li> </ul>                                                                                     |                                                                                                                                                                              | <ul style="list-style-type: none"> <li>• Low per-minute cost at scale</li> <li>• Global infrastructure</li> </ul>                                 |
|                       | <p>Prohibitively expensive for SMEs</p> <ul style="list-style-type: none"> <li>• Extremely slow deployment</li> <li>• High touch = low scalability</li> </ul> | <p>AI is not core focus</p> <ul style="list-style-type: none"> <li>• Pricing still out of SME range</li> <li>• No standardized AI offering</li> </ul> | <p>No true voice agent (rule-based only)</p> <ul style="list-style-type: none"> <li>• No local support</li> <li>• Not PRIS-compliant</li> <li>• No Perth presence</li> </ul> | <p>Zero local support</p> <ul style="list-style-type: none"> <li>• Requires technical skill</li> <li>• No PRIS compliant</li> </ul>               |
|                       | <p><b>62–95% cheaper</b></p> <p>Fast to deploy, technical reliability—delivering 95% of the value at 5–10% of the cost and time.</p>                          | <p><b>AI-first focus,</b> transparent template pricing, no hidden cross-sell—pure voice agent value without agency markup.</p>                        | <p><b>Real LLM-powered</b> voice agents, local Perth support, PRIS Compliant—transforming “cheap” into “professionally affordable.”</p>                                      | <p>Fully managed implementation, <b>no technical skill required</b>, Australian data hosting, removing the DIY barrier for non-technical SMEs</p> |

This analysis reveals that the “white space” is not just about price. It is a service model gap. The market offers either high-cost, high-touch custom solutions or low-cost, no-touch **DIY platforms**. Good AI Australia is the only provider offering a **“Managed Implementation”** model that gives Perth SMEs the best of both worlds: an

affordable, productized solution with the expert setup, management, and **local support** of a dedicated service provider.

## 3.6 PRICING STRATEGY

The pricing strategy is a core component of the business's market penetration plan, deliberately designed to be aggressive and disruptive.<sup>1</sup> It is a market-based competitive pricing strategy.

| Tier                          | Target Customer                            | Key Features                                                                 |
|-------------------------------|--------------------------------------------|------------------------------------------------------------------------------|
| Business Starter (Micro)      | Sole traders, micro-businesses (1–3 staff) | Basic call answering, knowledge base/FAQ access, single transfer number      |
| Basic Subscription            | Small businesses (5–15 staff)              | General enquiries assistant, knowledge base/FAQ, transfer to personal number |
| Meetings & Bookings           | Service businesses needing scheduling      | All Basic features + calendar integration, meeting reminders & invites       |
| Sales Lead Generation (PRO) ★ | B2B businesses, outbound sales teams       | All above + outbound batch calls, custom voice design                        |

| Tier                        | Target Customer                  | Key Features                                                              |
|-----------------------------|----------------------------------|---------------------------------------------------------------------------|
| Property Management (PRO) ★ | Real estate, property managers   | All above + email/booking system integration, multi-number transfers      |
| Food & Hospitality (PRO) ★  | Restaurants, cafes, catering     | Multi-tree decision scope, event IDs, strict dietary adherence            |
| Complete Customized ♦       | Businesses with unique workflows | Pick-and-choose all features, custom voice clone, vocal design iterations |

**Note:** All subscriptions are variable based on minutes consumed. Additional minutes are automatically charged at \$0.25/min unless the client specifically directs a service cutoff when the limit is reached.

### 3.6.1 STRATEGIC PRICING RATIONALE

The pricing structure is designed around five strategic objectives:

1. **Market Penetration Across All SME Segments:** The new Business Starter tier at \$149/month captures micro-businesses and sole traders who were previously priced out, while the tiered structure creates natural upgrade paths as businesses grow.
2. **Value Perception Through Generosity:** By increasing included minutes across mid-tier plans (Basic: 800→1,000 mins; Meetings: 1,000→1,200 mins; Sales Lead: 1,200→1,500 mins; Hospitality: 2,000→2,200 mins), Good AI positions itself as

offering 20–50% more usage capacity than typical competitors at the same price points—creating a "more generous than expected" perception.

3. **Competitive Disruption:** Monthly subscriptions are set at 50–75% below typical local agency retainers (\$300–\$1,000) and setup fees are 85–93% lower than custom development (\$5,000–\$15,000). This is not simply about being cheap; it is about fundamentally changing the value equation for SME customers.
4. **Barrier to Entry for Competitors:** The combination of a low price point and a highly efficient, template-based delivery model create a competitive moat that is difficult for high-overhead agencies to replicate without fundamentally restructuring their business models.
5. **Volume-Based Profit Model with Healthy Margins:** Profitability is achieved through higher volume at sustainable margins (64–73% gross margin per tier), rather than a few high-margin custom projects. The setup fees provide immediate cash flow, while monthly subscriptions generate predictable recurring revenue.

### 3.6.2 PRICING VS. ALTERNATIVE SOLUTIONS

| Solution Type                                  | Annual Cost<br>(1 <sup>st</sup> Year)       | Good AI<br>Equivalent       | Savings                                               |
|------------------------------------------------|---------------------------------------------|-----------------------------|-------------------------------------------------------|
| Human receptionist<br>(part-time, 20 hrs/week) | \$31,200 (WA award wage)                    | \$1,987<br>Basic: \$2,687   | 91–94%                                                |
| Local AI agency (custom build)                 | \$11,000 setup +<br>\$6,000/year = \$17,000 | Complete Custom:<br>\$8,187 | 52%                                                   |
| DIY platform (self-managed, 3,000 min/mo)      | \$3,240 + 40 hours @<br>\$50/hr = \$5,240   | \$3,987                     | 24% (+ 40 hours saved)                                |
| Offshore AI receptionist<br>(no local support) | \$1,140–\$2,388                             | \$1,987                     | Comparable price,<br>superior support &<br>compliance |

### 3.6.3 PRICE ANCHORING & UPGRADE STRATEGY

The tiered structure is deliberately designed to create psychological price anchoring:

- **Business Starter (\$149)** serves as the "entry anchor"—affordable enough for budget-conscious buyers
- **Basic (\$199)** becomes the "default choice"—perceived as only \$50 more for 2x the minutes (500→1,000)
- **Meetings & Bookings (\$299)** is the "growth tier"—natural upgrade when businesses need scheduling
- **PRO tiers (\$399–\$499)** establish "premium positioning" without enterprise pricing

- **Complete Custom (\$599)** is the "aspirational tier"—still 52% cheaper than agency alternatives

This structure enables upselling momentum: customers typically start at Business Starter or Basic, then upgrade as they experience ROI and need additional features.

### 3.6.4 PRIS COMPLIANCE AS PRICE JUSTIFICATION

Unlike offshore competitors at \$29–\$75/month (which are not PRIS-compliant and offer no local support), Good AI's pricing includes built-in regulatory compliance for the upcoming PRIS Act 2026/2027. This transforms the pricing from "cost" to "investment in future-proof infrastructure"—a critical distinction for risk-averse Perth SMEs.

### 3.6.5 PROMOTIONAL STRATEGY (YEAR 1)

To accelerate initial adoption:

- **"Perth Pioneers" Program:** First 20 clients receive Month 1 free (worth \$149–\$599) when signing up for 12-month commitment
- **Annual Prepay Discount:** 12+1 model (pay for 12 months upfront, receive Month 13 free)—8.3% effective discount that improves cash flow
- **Referral Bonus:** Existing clients who refer a new customer receive one-month free service—creating viral growth mechanism
- **LCF Grant Application Support:** Free consultation to help clients access \$5K–\$50K LCF Digital Capability Grants—removing affordability objections entirely

## 4. RISK MANAGEMENT

### 4.1 RISK ASSESSMENT

---

---

| Risk/impact description                                                                                                                                                                    | Risk Rating                                                                                      | What we'll do to reduce this risk                                                                                                                                                                                                                                           |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Competitive Response:</b> An established agency like Dilate Digital launches a competing low-cost, template-based service.                                                              | <b>Medium</b>   | Achieve first-mover advantage by launching rapidly in Month 3 and aggressively acquiring market share. The 60-67% price undercut creates a significant financial barrier for high-overhead agencies to match. <sup>1</sup>                                                  |
| <b>Template Limitations &amp; Scope Creep:</b> A high percentage of clients demand features beyond the scope of the pre-built templates, challenging the efficiency of the business model. | <b>Medium</b>  | Maintain a strict policy of quoting all custom work separately at a premium rate (\$1,500-\$3,000). This filters an estimated 95% of non-essential requests. If 10+ clients request the same new feature, it will be developed as a new, higher-tier template. <sup>1</sup> |
| <b>Technology Platform Dependency:</b> The primary voice platform (Vapi.ai) significantly increases its prices, suffers prolonged outages, or ceases operations.                           | <b>Low</b>    | The AI agents are designed with a platform-agnostic architecture. This allows for migration to an alternative provider like Bland.ai within 2-4 weeks. A 12-month price lock will be sought with the initial provider. <sup>1</sup>                                         |
| <b>Inaccurate COGS Calculation:</b> The complex, multi-vendor pricing model of the chosen AI platform leads to underestimation of                                                          | <b>Low</b>                                                                                       | This risk has been proactively mitigated by conducting a thorough validation of platform pricing. The financial model is built using the validated "true cost" of                                                                                                           |

|                                             |  |                                                                                                        |
|---------------------------------------------|--|--------------------------------------------------------------------------------------------------------|
| operational costs and unprofitable pricing. |  | ~\$0.30/min, not the misleading platform-only fee, ensuring profit margins are realistic. <sup>7</sup> |
|---------------------------------------------|--|--------------------------------------------------------------------------------------------------------|

## 4.4 INSURANCE

---

Essential due to the expanding client base. The Founder is currently three-quarters of the way through a cybersecurity certification.

| Insurance type                   | Details                                                                                                                                                                |
|----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Public liability insurance       | Required minimum of \$5M coverage. Estimated annual premium: \$800 – \$1,200. <sup>1</sup>                                                                             |
| Professional indemnity insurance | Recommended \$2M coverage to protect against claims of negligence or failure to perform professional duties. Estimated annual premium: \$2,500 – \$3,500. <sup>1</sup> |
| Cyber liability insurance        | Recommended \$1M coverage to protect against data breaches and other cyber incidents. Estimated annual premium: \$1,500 – \$2,500. <sup>1</sup>                        |

## 4.5 INSURANCE COMPLIANCE

---

To ensure continuous coverage, the business will comply with all policy requirements. This includes implementing and documenting best-practice cybersecurity measures (e.g., strong passwords, multi-factor authentication), using

secure and reputable technology platforms, maintaining clear and transparent service level agreements with clients, and immediately reporting any potential incidents to the insurer as required by the policy terms.

## 4.6 LAWS WE'LL NEED TO COMPLY WITH

---

The business will operate in compliance with all relevant Australian federal and Western Australian state laws. Key legislation includes:

- **Competition and Consumer Act 2010 (Cth):** Ensuring all advertising and representations of service capabilities are accurate and not misleading.
- **Privacy Act 1988 (Cth):** Governing the handling of personal information collected from clients.
- **Income Tax Assessment Act 1997 (Cth):** Fulfilling all obligations regarding income tax as a sole trader.
- **A New Tax System (Goods and Services Tax) Act 1999 (Cth):** Registering for and remitting GST once the turnover threshold is met.

A significant piece of upcoming legislation is the ***Privacy and Responsible Information Sharing Act 2024 (WA)***. While its key provisions, including the 11 Information Privacy Principles (IPPs) and mandatory data breach notifications, do not commence until July 1, 2026, and January 1, 2027, respectively, the business strategy is to proactively align with these future standards.<sup>10</sup> This strategic decision to operate "as if" the law were already in effect transforms a future compliance requirement into a current market differentiator. By using Australian-hosted platforms and incorporating privacy-by-design into its templates, Good AI Australia offers its clients a "future-proof" solution, providing them with peace of mind and preparing them for the evolving regulatory landscape long before it becomes mandatory.

## 4.7 TAXATION WE WILL NEED TO REGISTER FOR

1. **Tax File Number (TFN):** The founder will use their individual TFN for reporting business income as a sole trader.
2. **Goods & Services Tax (GST):** The business will register for GST once its annual gross income is projected to meet or exceed the \$75,000 threshold. Based on the financial projections, this is expected to occur within the first year of trading. Prices listed in this plan are exclusive of GST.

## 5. GOALS AND KEY ACTIONS (KEY ACTIONS)

### 5.1 GOALS THE FIRST YEAR

|                                | (Months 1-2)                                  | (Months 3-4)                                         | (Months 5-12)                                        |
|--------------------------------|-----------------------------------------------|------------------------------------------------------|------------------------------------------------------|
| <b>Your Goal</b>               | Establish Core Product & Launch               | Achieve Market Traction                              | Scale Operations                                     |
| <b>Actions to achieve goal</b> | - Complete development of all 5 core AI agent | - Onboard the first 10-15 clients. - Refine template | - Scale client base to 60 active subscribers. - Hire |

|                 |                                                                                                                                                                                                   |                                                                                                                                       |                                                                                                                                                                                                  |
|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Due date</b> | templates (70 hours). – Finalize and launch the business website (goodai.au) with video demonstrations. – Obtain ABN and business name registration. – Secure approval for the SEA business plan. | functionality based on initial user feedback. – Achieve a minimum of \$3,000 MRR. – Establish a consistent local networking presence. | and train a Virtual Assistant (by Month 6) for administrative tasks. – Achieve a target of \$15,000 MRR by Month 12. – Begin development of advanced templates based on validated market demand. |
|                 | End of Month 2                                                                                                                                                                                    | End of Month 4                                                                                                                        | End of Month 12                                                                                                                                                                                  |
|                 | Kevin Tan                                                                                                                                                                                         | Kevin Tan                                                                                                                             | Kevin Tan                                                                                                                                                                                        |

## 5.2 GOALS FOR THE NEXT 3 YEARS

|  | Year 2 | Year 2-3 | Year3-4 |
|--|--------|----------|---------|
|  |        |          |         |

| <b>Your Goal</b>               | Steady stream of income and profitability                                                                                                                                                                                                                                | Service Expansion (Year 2-3)                                                                                                                                                                                                                                                                                                   | Sustainable Growth (Year 3)                                                                                                                                                                                                                                                                   |
|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Actions to achieve goal</b> | <ul style="list-style-type: none"> <li>- Grow the client base to 100+ Perth-based SMEs. - Achieve an annual revenue target of \$200,000. - Solidify the brand as the go-to provider for accessible AI in WA. - Hire a part-time technical support contractor.</li> </ul> | <ul style="list-style-type: none"> <li>- Launch a new suite of "Pro" templates with more advanced capabilities (e.g., CRM integration, outbound calling). - Explore expansion into other WA regional centers (e.g., Bunbury, Mandurah). - Develop a channel partner program with IT consultants and web developers.</li> </ul> | <ul style="list-style-type: none"> <li>- Achieve an annual revenue target of \$300,000+. - Transition the first full-time employee from contractor to staff. - Evaluate transitioning the business structure from Sole Trader to a Company structure to facilitate further growth.</li> </ul> |
| <b>Due date</b>                | End of Year 2                                                                                                                                                                                                                                                            | End of Year 3                                                                                                                                                                                                                                                                                                                  | End of Year 3                                                                                                                                                                                                                                                                                 |
| <b>Who's responsible</b>       | Kevin Tan                                                                                                                                                                                                                                                                | Kevin Tan                                                                                                                                                                                                                                                                                                                      | Kevin Tan                                                                                                                                                                                                                                                                                     |

## 6. WORK PRIORITIES

## 6.1 PERSONAL COMMITMENTS

Although the founder has carer commitments that require working from home, this will not impede the ability to dedicate full-time hours (35+ hours per week) to the business during the SEA program period.

## 6.2 WORK WEEK PLANNER

The initial 2 months will be heavily focused on development. From Month 3 onwards, the focus will shift to a balance of sales, deployment, and support.

|         | Mon                                          | Tue                                      | Wed                                          | Thu                                      | Fri                             |
|---------|----------------------------------------------|------------------------------------------|----------------------------------------------|------------------------------------------|---------------------------------|
| AM      | Client Deployment s & Support                | Sales & Marketing (Networking, Outreach) | Client Deployment s & Support                | Sales & Marketing (Networking, Outreach) | Business Development & Strategy |
| PM      | Sales & Marketing (Follow-ups)               | Product Development & Refinement         | Sales & Marketing (Follow-ups)               | Client Meetings & Onboarding             | Bookkeeping & Admin             |
| Evening | Professional Development (Courses, Research) |                                          | Professional Development (Courses, Research) |                                          |                                 |

7. THE FINANCES

7.1 FINANCE NEEDED

Please refer to attached financial plan.

7.2 SOURCES OF FUNDING

7.3 BALANCE FORECAST

|  |
|--|
|  |
|--|

Refer to the attached detailed Financial Plan document.

## 7.4 PROFIT AND LOSS FORECAST

---

Refer to the attached detailed Financial Plan document. The key figures from the Profitability Analysis are summarized below. It is important to note that the Cost of Goods Sold (COGS) has been recalculated from the initial draft to reflect the validated "true cost" of the underlying technology platform, ensuring a more accurate and realistic financial projection.

## 7.5 CASH FLOW FORECAST

---

Refer to the attached detailed Financial Plan document.

## 7.6 BREAK-EVEN ANALYSIS (COST STRUCTURE)

---

The break-even point, where monthly revenue equals total monthly costs (COGS + Operating Expenses), is projected to be reached in Month 4 or 5 of operations. This is based on achieving the initial client acquisition targets set in the 12-month roadmap.<sup>1</sup>

# 8. SUPPORTING DOCUMENT CHECKLIST

All required documents, including this Business Plan, the detailed Financial Plan, and proof of pending business registration, will be submitted via the appropriate channels.

## 8.1 PREVIOUS NEIS OR SELF-EMPLOYMENT ASSISTANCE?

---

[X] I have never received NEIS or Self-Employment Assistance.

## 9. TRAVEL AND THE SEA ALLOWANCE

### 9.1 TRAVEL FOR BUSINESS OR PERSONAL?

---

[X] I am going to receive the SEA Allowance.

[X] I do not plan on leaving Western Australia or Australia, during the 9-months I will receive SEA payments.<sup>1</sup>

## 4.3 PESTEL ANALYSIS

### POLITICAL

- **WA-Specific Factor:** Government supports digital adoption through initiatives like the Local Capability Fund (LCF) – Digital Transformation Grant, offering up to \$50,000 in matched funding for new technologies and enhance operations.
- **Strategic Response:** The voice agent is a "grant-ready" solution, aligning marketing and proposals with LCF goals. We'll assist SMEs in applying for grants to help fund voice agent implementation, positioning it as a co-investment with the government.

### ECONOMIC

- **WA-Specific Factor:** The WA economy is strong overall, but SMEs struggle with rising labour costs (3.75% minimum wage hike from July 2025) and a shortage of skilled staff, especially for admin and customer service roles.
- **Strategic Response:** Our AI voice agent solves this issue by providing 24/7 coverage, ensuring no missed leads, and costing less than a single admin's sick day—far cheaper than hiring a full-time receptionist (~\$60k+ annually).

### TECHNOLOGICAL

- **WA Factor:** Widespread NBN FTTP upgrades across WA have resolved previous quality concerns. ACCC data now confirms reliable, high-speed, and low-latency performance is the standard.
- **Strategic Response:** This de-risks the product. We can confidently guarantee a high-quality, low-latency connection and market the agent as a "high-definition voice" solution that is more reliable than basic mobile diversions.

### SOCIAL

- **WA Factor:** Customers expect 24/7 digital convenience but are frustrated by impersonal bots and value a "local" touch.
- **Strategic Response:** Avoid the "chatbot" label. We will brand this as a "Sovereign AI Assistant" or "Perth-based Virtual Receptionist" that understands local nuances, providing a professional, local experience 24/7.

### LEGAL

- **WA Factor:** The Privacy and Responsible Information Sharing (PRIS) Act 2024 is now a major concern for SMEs, with key compliance and breach-reporting deadlines looming in 2026 and 2027.
- **Strategic Response:** This is a primary selling point. We will lead with a "PRIS Act-Ready" and "Data-Sovereign" solution, guaranteeing all personal data is hosted and processed in Australia to solve this compliance burden for clients

### ENVIRONMENTAL

- **WA Factor:** Mandatory ESG reporting for large companies is "flowing down" to their SME suppliers, who are now being asked to prove their own sustainability.
- **Strategic Response:** Position the service as a "Green Tech" solution. By using our efficient cloud AI instead of legacy hardware, SMEs can tangibly reduce their own carbon footprint and meet a key supply chain requirement.

# 4.2 SWOT Analysis

Good Ai Australia [Phase 1]

Date : 21/10/2025

## S

### Strengths

### Weaknesses

## W

- **Founder Expertise:** Top-tier credentials in prompt engineering, ensuring a high-quality technical product.
- **Disruptive Pricing:** 50-67% below market rates creates a powerful competitive advantage.
- **Speed to Market:** 48-hour deployment is unmatched by custom developers.
- **Scalable Model:** The template-based approach allows for rapid client onboarding with minimal incremental effort (1 hour per client).

- **Founder Dependency:** As a sole trader, the business is entirely dependent on the founder's availability and health.
- **Limited Service Scope:** The template model, by design, does not cater to clients with highly unique or complex requirements.
- **New Brand:** Lacks the established reputation and client portfolio of competitors like Dilate Digital.

## O

### Opportunities

### Threats

## T

- **Untapped SME Market:** Significant, underserved market of Perth SMEs currently priced out of AI solutions.
- **Upcoming PRIS Act:** New WA privacy legislation allows positioning as a "future-proof," privacy-by-design solution.
- **Technology Advancement:** Ongoing AI improvements will enable increasingly sophisticated future templates.

- **Established agencies** may **counter** with their own low-cost, template-based services.
- **Relying on third-party** platforms (e.g., Vapi.ai) risks price hikes, poor performance, or service shutdown.
- **New competitors** or DIY platforms could lead to price compression, squeezing margins.
