

Strategic transformation Report: Weitj Investments

A culturally-grounded map for
sustainable growth &
generational legacy for all
Australians

Prepared for:
Gerry & Devyn Matera

Presented by
Kevin Tan

Oct2025

The Weitj Ecosystem

Weitj—the Nyoongar name for Emu, Australia's largest native bird—can only walk forward. As the Mataka's totem, it symbolizes the philosophy that drives this extraordinary ecosystem that's been built through strength, sustainability, and unwavering progress.

For over 60,000 years, Aboriginal people sustained the harsh environment with trade networks built on trust, reciprocity and genuine respect for the land. The modern era may be ground-breaking, but in hind-sight. The first nation found true happiness as a civilization - a challenge western society is yet to overcome.

Weitj Investments' legacy in creating Aboriginal-led enterprises rooted in cultural governance and designed to last for generations is exactly what is required in modern Australia. Weitj stands in a position of remarkable strength—3 Australian Security Industry Awards, 140+ jobs created and blue-chip contracts with BHP and Rio Tinto —the portfolio is now at a pivotal moment.

This report maps the pathway forward: from \$30M to \$90M over 3 years, from founder-led start up to institutionalized excellence, from entrepreneurial vision to a necessary call to action that will impact all Australians.

Part I: Celebrating Strength

FOR-PROFIT, FOR PURPOSE

Weitj Investments operates as an integrated value system where commercial entities generate financial capital that funds mission-driven enablers, which in turn produce cultural capital—authenticity, narrative, and social license—that enhances commercial brand equity.

ENTITY	STRATEGY	REVENUE	JOBS
Eon Protection	Financial Engine & Legal Anchor	\$15 Million	60+
Gather Hospitality	Culture-to-commerce	\$8.5 Million	40
Gather X (SaaS)	Scalable Tech & IP Platform	\$50k startup revenue	5
Gather Films	Brand & Narrative Engine	\$2.0 Million	10
Indigenous Defence Services	AUKUS Growth Opportunity	\$3.5 Million	15
Corroboree for Life	Cultural Heart	\$1 Million	10
TOTAL ECOSYSTEM	Multi-Energy Synergy	#30.5 Million	140+

Unimpeachable Competitive Moat

Structural Authenticity

Eon Protection
legal entity:
100% Aboriginal
ownership

Gather Foundation
protecting Indigenous
Cultural and
Intellectual Property:
Not-for-profit R&D
backbone

Gather Films:
In-house narrative
control

Corroboree for Life
amalgamated
with Gather Foods:
Cultural
integration

This multi-layered verification is impossible for competitors to replicate and positions Weitj as the low-risk, high-impact choice for Commonwealth and corporate clients with Indigenous Procurement Policy (IPP) mandates.

2025 Proof of Excellence

GERRY'S LEADERSHIP RECOGNITION:

- First Aboriginal Senior Vice President, Pride WA
- International speaker on Indigenous economic empowerment
- Recognized locally, nationally, and internationally for business excellence
- Keynote speaker on "First Entrepreneurs" philosophy

EON PROTECTIONS:

- Swept the Australian Security Industry Awards in Melbourne (December 2024), winning:
- Excellence in Diversity and Inclusion
- Outstanding Security Performance

GATHER FOODS (GLOBAL RECOGNITION):

- Featured in Luxe Life Magazine for 2023 Global Awards
- Expanding US and Europe channel partnerships
- Building capabilities to introduce native Aboriginal products worldwide

Part II: The Opportunity

13.5 Million in untapped potential

1. Indigenous Procurement Policy Expansion

- Target increases from 2.5% to 3% in July 2025, rising to 4% by 2030.
- Represents \$9.5+ billion Commonwealth procurement opportunity.
- New 51% Indigenous ownership requirement (July 2026) tightens eligibility.

2. AUKUS Defence Spending

- \$12 billion Henderson facility investment announced
- \$738M spent on WA's first AUKUS works
- Indigenous supplier ecosystem development priority

3. Australian Native Food Market Growth

- Projected to reach \$300M by 2025
- International demand for Indigenous ingredients (kakadu plum, wattle seed, finger lime)
- Premium pricing for authenticated, ethically-sourced products

4. First Nation Digital Transformation

- New IBA Digital Catalyst Program Launched (June 2025)
- First Nations Digital Inclusion Plan (2023 - 2026)
- Amazon could skilling for First Nation Tech Business
- IPD, CBC & many other local, state and government grants ranging from \$20k to \$150k per project.

OPPORTUNITY #1: EON → GATHER PIPELINE (CROSS-SELL)

- ADDRESSABLE REVENUE: **10.0M**
- CURRENT CAPTURE: **1.0M (10%)**
- GROWTH POTENTIAL: **\$9.0M**

STRATEGY:

Systematize cross-selling of Gather Foods catering + Corroboree for Life cultural experiences + Gather Films video production to Eon Protection's existing blue-chip mining/infrastructure clients.

Rationale: Eon has already navigated complex procurement, established C-suite trust, and demonstrated capability. Introducing high-margin services bypasses traditional sales barriers.

IMPLEMENTATION:

1. Identify top 10 Eon clients with highest facilities/events spend.
2. Create "Tier 1 Cultural Event Package": Gather Foods premium catering + Corroboree for Life Welcome to Country + Gather Films event documentation = \$50K-\$150K per event
3. Pilot with 3 clients in Q1 2026 (FIFO camp catering, corporate Reconciliation events)
4. Target \$2.5M additional revenue from existing relationships by Year 1

COMPETITIVE ADVANTAGE:

Unmatched integration—no other supplier can offer authenticated, vertically-integrated Indigenous cultural + culinary + media package.

OPPORTUNITY #2: AUSTRALIAN NATIVE FOOD EXPORT MARKET

- ADDRESSABLE REVENUE: **15.0M**
- CURRENT CAPTURE: **1.8M (12%)**
- GROWTH POTENTIAL: **\$13.2M**

STRATEGY:

Develop "Certified by Gather Foundation" premium label for Gather Foods/Spirits products, guaranteeing ICIP protection, ethical sourcing, and First Nations benefit-sharing.

Market Trend: Australian organic food market growing at 5.4% CAGR to \$1.46B by 2034. Indigenous ingredients are premium trend in health-conscious consumers. E-commerce is an unprecedented platform to spread the word about Native Australian Ingredients. Ensure to watch for hype and scalability if it does take off.

IMPLEMENTATION:

1. Gather Foundation develops certification framework (6 months, \$75,000)
2. Launch 3 certified SKUs through Gather Spirits + Gather Foods retail
3. Premium pricing: 25-35% higher than non-certified equivalents
4. Distribution: Target Coles/Woolworths specialty sections, export to IJS/IJK markets
5. Target: 33.5M incremental revenue by Year 2 from certified range.

COMPETITIVE EDGE:

- Zero competition, genuinely healthy and tasty product.
- Authentically sourced and ethically made.
- Taste phenomenal
- Will take the world by storm so watch scalability

OPPORTUNITY #3: AUKUS INDIGENOUS SUPPLIER ECOSYSTEM

- ADDRESSABLE REVENUE: **40.0M**
- CURRENT CAPTURE: **2.0M (5%)**
- GROWTH POTENTIAL: **\$38.0M**

Reality Check: AUKUS supply chain access requires **Tier 2/3 subcontracting**, not prime contracts. Indigenous Defence Services must achieve **mandatory compliance** before scaling.

CRITICAL COMPLIANCE GAPS (DETAILED ANALYSIS FURTHER ON)

- Defence Industry Security Program (DI SP) membership - STATUS UNKNOWN
- Security clearances for personnel (6-12-month process) - STATUS UNKNOWN
- AS9100 quality certification - NOT DISCLOSED
- Export control compliance (ITAR/EAR for AUKI-JS work) - HIGH RISK

Realistic Goal: Secure 1-2 subcontracts in \$500K-\$2M range by mid-2026, not 325M by Year 3, pending compliance achievement.

OPPORTUNITY #4: FIRST NATIONS SAAS MARKET

- **ADDRESSABLE REVENUE: 12.5M**
- **CURRENT CAPTURE: 0.0M (PRE-LAUNCH)**
- **GROWTH POTENTIAL: \$12.5M**

CRITICAL

- 31.5M investment proposed for platform with ZERO validated customer demand.
- Industry failure rates: 92% Of SaaS startups fail within 3 with 42% citing "no market 72].

RED FLAGS:

- No product market fit validation
- Undefined go-to-market strategy
- No pricing model
- Niche market constraints (12,000-16,000 Indigenous businesses in Australia)
- 18-24 month "valley of death" (pre-revenue cash depletion crisis)

RECOMMENDATION:

HALT platform development. Execute 90-day customer discovery sprint:

1. Conduct 50+ structured interviews with Indigenous business owners
2. Validate willingness to pay: test 3 pricing tiers (\$49/mo., \$149/mo., \$499/mo.)
3. Build minimum viable product (WP) with 3 core features only
4. Secure 10 paying pilot customers before scaling
5. Hire CTO + 2 full-stack developers (don't outsource core tech)

Alternative Strategy:

See offering below*

OPPORTUNITY #5: GATHER FILMS - CORPORATE VIDEO MARKET (WA)

- ADDRESSABLE REVENUE: **12.0M**
- CURRENT CAPTURE: **1.8M (15%)**
- GROWTH POTENTIAL: **\$10.2M**

STRATEGY:

Formalize Gather Films as internal creative agency serving portfolio first, external clients second. Invest in AI video editing, virtual production, and content management systems.

IMPLEMENTATION:

1. **Equipment upgrade:** Adobe Creative Cloud + Frame in + Blackmagic Design (3400K)
2. **Guaranteed internal worth:** All Eon Protection tenders include promotional videos; Gather Foods brand content; IDS capability videos
3. **External expansion:** Target WA mining/infrastructure corporate video market (BHP, Woodside, FMG)
4. **Pricing:** Premium Aboriginal storytelling + technical excellence = 20% above market rate
5. **Target:** \$3 M by Year 1, \$7 M by Year 3. Addressable Revenue: \$40.0M

OPPORTUNITY #6: IPP COMPLIANT INTEGRATED SERVICES

- **ADDRESSABLE REVENUE: 360.0M**
- **CURRENT CAPTURE: 34.8M (8%)**
- **GROWTH POTENTIAL: \$55.2M**

STRATEGY:

Bundle Eon Protection security + Gather Foods catering + IDS infrastructure services + Gather Films documentation as "IPP One-Stop Solution" for major mining/infrastructure projects.

Competitive Differentiation: Only fully integrated, 100% Aboriginal-owned service provider capable of delivering across security, food services, infrastructure, and media under single contract.

Target Clients:

- BHP, Rio Tinto, Fortescue Metals Group (existing Eon relationships)
- Commonwealth defense infrastructure projects
- WA Government major works (new Perth Stadium, infrastructure projects)

IMPLEMENTATION:

1. Develop "IPP Integrated Services Playbook" (30-page capability statement)
2. Joint business development team across Eon + Gather Foods + IDS
3. Guarantee 4%+ Indigenous employment + 3%+ Indigenous supplier spends (exceeding IPP minimums)
4. **Target:** Win 2-3 major integrated contracts by Year 2 (\$20M+ each)

PART I: THE CHALLENGES - GAPS TO ADDRESS

A MESSAGE OF TRANSPARENCY

As Gerry Matera himself said:

"The more open and transparent am with myself, the more success have, the deeper friendships get, and the more my business succeeds."

In that spirit of transparency, this section identifies structural vulnerabilities that, if unaddressed, threaten the ecosystem's sustainability. These are not failures—they are gaps to close as the portfolio evolves from entrepreneurial startup to institutionalized excellence.

TIER 1 CRITICAL VULNERABILITIES

1. LEGAL STRUCTURE FRAGILITY – CULTURAL WEALTH PROTECTION ISSUE

The Gap: All public-facing brands (WEITJ, WEITJ INVESTMENTS GROUP, GATHER X) operate under EON PROTECTION PTY LTD (ABN 87 627 990 381) as registered trading names. A lawsuit, regulatory breach, or insolvency in ANY division threatens the entire portfolio.

Comparable Precedent: Marawa Pty Ltd entered administration February 2, 2024. EJ Gerry Matera stated he resigned in 2023 due to "misalignment of ethics and values". This high-profile failure demonstrates the reputational cascade effect.

Why This Matters for Cultural Legacy: The 60,000-year trade legacy you're building deserves structural protection. One legal challenge can't be allowed to erase the entire ecosystem.

Recommendation: Immediate corporate restructuring – establish Investments Holdings Pty Ltd as parent, with each major brand (Eon Protection, Gather H G, IOS, Gather Films) as separate subsidiary.

Investment: \$150,000 – 250,000k (legal + accounting)

Payback: Risk elimination + "First 100% Aboriginal holding company with diversified portfolio in WA"

Timeline: 90 days

2. MARKET VALIDATION DEFICIT – VISIBILITY THROUGH VALIDATION

The Gap: Platform proposed with 31.5M investment but zero validated customer demand

SaaS Industry Reality:

- 92% of SaaS startups fail within 3
- 42% cite "no market"
- 18-24 month "valley Of death" for pre-revenue platforms

Recommendation: 90-day customer discovery sprint before platform development:

- Interview 50+ Indigenous business owners
- Test 3 pricing tiers with willingness-to-pay validation
- Build MVP with 3 core features only
- Secure 10 paying pilot customers
- Hire CTO + 2 developers

OR:

MY OFFERING

The directive has always been simple: **to close the gap** – not just in efficiency or productivity, but in wealth, access, and authorship. For too long, the national narrative has treated progress as something granted downward, when in truth it must be built upward – through ownership, creation, and community. Royalties are being bypassed, and tax policies are exacerbating the wealth gap. Major mining interests have effectively taken control of the nation. After repeated delays

and a failure of the government to act responsibly, it is imperative that we take action, or face the prospect of poverty by 2030

Weitj Investments mission of intergenerational empowerment aligns directly with the plan and the structure is intentionally designed to create employment, creative ownership, and technical literacy for the Aboriginal people. .

A **digital transformation with Gather X** will be not only impactful to it's other services but for the aboriginal community as a whole. The vision is not to impose reconciliation, but to **merge purpose into action** and build first nation a solid foundation in the coming tech era while remaining culturally grounded; exposing the youth who are interested not just in tech, but in creative design.

The AI solution advantage is it's dire need for the service offerings themselves, which directly address the Australian inefficiency gap the government is so desperate to close. The services go hand in hand; enabling a one-stop-shop for businesses who will have no choice but to adapt new technology. What is offered is not only feasible, but an unseen necessity that will stump Australian's when forced to use AI. (market research attached*).

SERVICES [ALL COMPLETELY SOVEREIGN IN COMPLIANCE WITH THE PRIS Act]:

- **The Digital Health Check** – Agentic workflow identifying business' readiness for transformation; gifting the owner with a thorough strategic report, 1-page infographic, audio analysis, video instructions, 1x AI knowledge bot all packaged on a 1-page interactive website. (market value = \$2500, time = 10 mins).
- **Data cleaning SaaS platform** – 80% of SME's don't have clean data. This is the gaping hole the market that no one has thought of filling yet, as Unstructured data doesn't work with AI and businesses integrating will realize soon enough. The Architecture is sound and PRIS compliant.. But has not been built.
- **Voice Agents (5x templated industries built)** – This will not only ease the burden of enquiries and loss profit from WA businesses (\$4 billion a year). But aid in closing Australia's inefficiency gap.
- **Tiered Chatbots** – The simplest one-click solution that people who wish for data privacy cannot find anywhere else at this moment. All tiers are built 100% sovereign.
- **Web Development** – Hand in hand with chatbots. Australia's website practices are dangerously behind the rest of the world. Cloudflare must be imposed before hackers realize no one here is protected.

- **Brand/Content Creation** – Customise Content creation app for brand creation and data sovereignty using new state of the art open-sourced AI generated models who don't "steal" the artist's work but elevate creativity..
- **Video creation** – Tools like LTX Video and Flow will propel Gather Films workflow and boost creativity allowing access for any who wish to tell their story. [Made specifically to generate scenes, storyboard and ship all within one dashboard]

FIRST NATION EMPOWERMENT STRATEGY:

Once the core tiered chatbots, voice agents and automation systems are established, the program can begin onboarding **First Nations interns** into Tier 1 roles – managing and maintaining client-facing AI systems that are simple to learn yet foundational to digital operations. From there, participants can progress to higher technical tiers or pivot laterally into creative fields such as **branding, digital art, and content creation**.

These creative avenues are profoundly significant. Aboriginal artists and storytellers can express their culture and identity through digital media, designing interface art, social content, and branding elements. This allows them to integrate their narratives into the global online economy, leveraging technology as a tool for preservation and growth, thereby safeguarding their culture.

This dual-track approach, encompassing both technical and creative aspects, ensures that every role within the digital factory contributes to a unified objective: to introduce these new technologies to First Nation youth, enabling them to learn and utilize them. This equips them for the next era, on their own community's terms, transforming passive consumption into active creation and wage work into ownership.

STRATEGIC ADVANTAGE

This business model positions AI as both an **engine and enabler** within the Weiti ecosystem. The expanding First Nations digital workforce will manage Tier 1 operations and creative production, freeing senior engineers and founders to concentrate on scaling advanced projects, expanding GatherX, and developing

sovereign automation tools. These tools will remain rooted in Weijtj's core values of trust, respect, and reciprocity.

Backed by \$1.4 billion in grants for Australia's digital adoption, these initiatives collectively form a unified strategy. This approach aims to bridge the wealth gap, not through subsidies or sentiment, but by fostering active participation, skill development, and shared ownership within the emerging economy.

3. IDS PEFENG COMPLIANCE BLACKBOX – PROVING ABORIGINAL EXCELLENCE

The Gap: Indigenous policies lack publicly visible.

Available Defense industry Security Program (DISP) membership

- Security clearances for personnel
- AS9100 quality certification
- IPPRS reporting capability
- Export control compliance (ITAR/EAR)

Perception Battle: You've already fought the perception that Aboriginal businesses "may not be good, may not show up, may not complete the job with quality". AUKUS compliance proves you're MORE capable, not less.

Consequence of Non-compliance: CATASTROPHIC blacklisting from all Commonwealth contracts

RECOMMENDATION:

1. Immediate compliance audit by procurement specialist (\$50,000)
2. Begin DISP application process (8-12 months)
3. Initiate personnel security clearances (6-12 months)
4. Engage export control lawyer for AIJKIS compliance

Success Celebration: "First Aboriginal-owned DISP-certified contractor in WA—breaking barriers"

TIER 2 OPERATIONAL VULNERABILITIES

4. SIMULTANEOUS MULTI-SECTOR EXECUTION OVERLOAD

The Gap: Scaling Gather Foods (food manufacturing) + launching (SaaS tech) + winning contracts (IOS) + producing films = 4 distinct industries requiring specialized expertise, managed concurrently.

Indigenous Business Failure Data: 67% Of Indigenous corporate failures stem from poor management governance, with inadequate capacity to manage complexity.

Your Vision is Bigger Than One Person: This isn't about limitation—it's about recognizing that the ecosystem you've built requires the leadership bench your vision deserves

RECOMMENDATION:

1. **Strategic Focus Decision:** Identify 2 priority entities for 2026
2. **Recommended pioitization:** (1) Eon Protection (stable cash cow) + (2) Gather Hospitality Group (highest growth + market validation)
3. Move to 2027 launch after customer discovery
4. **IOS:** Strategic partnership model until compliance achieved
5. **Gather Films:** Lean internal agency, limit external projects

5. FOUNDER BOTTLENECK & SUCCESSION DEFICIT

The Gap: Gerry Matera serves as MD of Eon Protection, Founder of 5+ entities, Senior Vice President of Pride.

Football Parallel: You said "footy lends itself to masculine demographic" business is a team sport too. You don't play football alone. It's time to empower your captains.

Pride WA Leadership Model: Pride WA has LGBTIQ+ elders. Wein needs business elders. Your vision is bigger than one person—build the council that carries it forward.

RECOMMENDATION:

1. Appoint CEO for each major entity reporting to Gerry as Executive Chairman
2. **Eon Protection:** Hire experienced General Manager (Security Operations)
3. **Gather HG:** Promote senior leader to Managing Director role
4. Create Advisory Board with expertise in tech, food manufacturing, finance
5. **Equity incentives:** Offer 5-10% stakes to attract senior talent

Success Celebration: "CEOs empowered = Gerry becomes Chairman/Visionary—legacy secured"

6. PARTNERSHIP DUE DILIGENCE FRAMEWORK – PREVENTING ANOTHER

The Gap: Marawar partnership entered administration 2024; Gerry departed 2023 citing "ethics misalignment" No

Form vetting framework implemented post-failure.

This Framework is Armor Against Betrayal: Not bureaucracy—it's protection so you never experience another ethics misalignment.

RECOMMENDATION: Develop "Weitz Partner Scorecard":

- Cultural alignment assessment (40% weight)
- Financial stability verification (30%)
- Track record with Indigenous suppliers (20%)
- Governance transparency (10%)

Minimum vetting: 6-month due diligence for partnerships >\$1M

Pilot-first approach: All JVs begin with 12-month pilot phase

PART IV: THE ROADMAP - WALKING FORWARD LIKE WEITJ

3-YEAR REVENUE PROJECTION: \$30M

Entity	Current (Million)	Year 1 (Million)	Year 2 (Million)	Year 3 (Million)	3-Year CAGR
EON	15.0	18.0	22.5	27.0	21.6%
Gather Hospitality	8.5	12.5	17.5	24.0	41.3%
Gather X	0.05	0.25	1.2	4.5	348.1%
Gather Films	2.0	3.5	5.0	7.0	51.8%
IDS	3.5	8.0	15.0	25.0	92.6%
Corroboree for Life	1.0	1.5	2.0	2.5	44.1%
TOTAL	30.5	43.75	63.2	90.0	44.1%

Source: Portfolio analysis + market projections

90-DAY IMMEDIATE ACTION PLAN

PHASE 1: STABILIZE & DE-RISK (DAYS 1-30)

ACTION 1: EMERGENCY LEGAL RESTRUCTURE

Owner: External corporate lawyer (Corrs Chambers Westgarth)

Deliverable: Legal structure memo with holding company options

- **Budget:** \$50,000

Cultural Framing: "Protect the 60,000-year legacy. Cultural wealth protection."

ACTION 2: IDS COMPLIANCE AUDIT

Owner: Defence Procurement specialist

Deliverable: Gap analysis on DISP, IPPRS, IPP, ITAR/EAR compliance

- **Budget:** \$50,000

Cultural Framing: "Prove Aboriginal excellence to doubters"

ACTION 3: FINANCIAL CONSOLIDATION

Owner: CFO or external accounting firm

Deliverable: Consolidated P&L, balance sheet, cash flow

- **Budget:** \$25,000

Cultural Framing: "Transparency attracts growth capital"

ACTION 4: CUSTOMER DISCOVERY SPRINT

Owner: Product Manager (hire fractional PM if needed)

Deliverable: 50+ interviews, demand validation, willingness-to-pay analysis

- **Budget:** \$30,000

Cultural Framing: "Make visible through validation"

PHASE 2: OPTIMIZE & SYSTEMATIZE (DAYS 31-60)

ACTION 5 – PARTNER VETTING FRAMEWORK

Owner: General Counsel (new hire)

Deliverable: "Partner Scorecard" with cultural alignment assessment

- Budget Internal (GC time)

Cultural Framing: "Armor against betrayal—prevent another Marawar"

ACTION 6: GATHER FOUNDATION'S CERTIFICATION DEVELOPMENT

Owner: Gather Foundation + external IP lawyer

Deliverable: "Certified by Gather Foundation framework", trademark

- Budget \$75,000

Cultural Framing: "Premium product differentiation, ICIP protection"

ACTION 7: EON – GATHER SALES PIPELINE

Owner: Eon GM + Gather Foods Sales Director

Deliverable: Top 10 clienttargeting list, 'Tier 1 Cultural Event Package'

- Budget \$15,000

Cultural Framing: "Bring Eon clientsto the Gather table—reciprocity"

ACTION 8: TALENTACQUISITION –PRIORITY HIRES

Owner: Executive search firm (Chandler Macleod Indigenous recruitment)

Deliverable: Hire (1) Eon GM, (2) 9!bgOCCTO (conditional), (3) General Counsel

- Budget \$75,000

Cultural Framing: "Empower your captains—business is a team sport"

PHASE 3: SCALE & EXECUTE (DAYS 61-90)

ACTION 8: ADVISORY BOARD FORMATION – COUNCIL OF ELDERS

Owner: Gerry Matera

- **Deliverable:** board: (1) Hon Ken Wyatt (already on Eon board) B-J, (2) Oet.gnggexpert, (3) Food manufacturing executive, (4) Tech/SaaS founder, (5) CFO/Finance
- Budget \$50,000/year (advisory fees)

Cultural Framing: Pride WA has elders; Weitj needs business elders. (1) manufacturing executive, Tech/SaaS founder, CFO/Finance.

ACTION 9: CAPITAL RAISE PREPARATION

OWNER: CFO + INVESTMENT BANKER

Deliverable: Information memorandum, financial model, investor roadshow

Budget \$100,000

Cultural Framing: "Secure \$3M-\$5M from IBA, venture debt, strategic investors"

ACTION 10: DIGITAL TRANSFORMATION ROADMAP APPROVAL

Owner: Executive team + technology consultant

DELIVERABLES:

A strategic, phased plan designed to significantly enhance your technological infrastructure and customer engagement capabilities. The initiative encompasses three critical areas: the comprehensive upgrade of your existing Eon AI platform, the development and integration of robust Gather e-commerce functionalities, and the implementation of a sophisticated ecosystem Customer Relationship Management (CRM) system. This multi-faceted approach aims to streamline operations, improve data intelligence, expand market reach, and foster stronger, more interconnected relationships across our entire business ecosystem.

CULTURAL FRAMING:

\$3.85M technology investment for competitive advantage. Leading first nation as early adopters amongst the averse Australian market "

ACTION 12: IDS STRATEGIC PARTNERSHIP PILOT

Owner: IDS MD + consultant

DELIVERABLE:

- Secure 1-2 Tier 2 subcontracts (\$500K-\$2M range)
- Budget \$25,000

CULTURAL FRAMING:

Validate IDS capability before over-committing capital"

FUNDING STRATEGY:

1. Indigenous Business (IBA) – Business Development loans
2. First Capital – Impact investment fund (\$80M +
3. CSIRO Kick-Start – R&D grants for Indigenous agribusiness (\$50K-\$250K)
4. NAB Indigenous Business Banking – Projected 4% annual growth[A56]
5. Strategic Investors – Mining/infrastructure companies (BHP, Rio) as LPs

CRITICAL CONDITION: DO NOT DEPLOY X\$1.5M UNTIL:

- 50+ customer discovery intenjIEWS completed
- 10 beta customers signed with letters of intent
- Product-marketfit validated (40%+ "very disappointed" if product removed)

PRIORITY #1: EON PROTECTION AL-ENHANCED REMOTE MONITORING

BUSINESS CASE:

Security industry transitioning from reactive (guards on-site) to proactive (AI-powered remote surveillance). Remote monitoring reduces labor costs by 40-60% while improving incident

IMPLEMENTATION:

- 1. Integrate AI video analytics with existing CCTV at client sites
- 2. Develop custom ML models for mining/infrastructure environments
- 3. 24/7 monitoring center staffed by Indigenous personnel
- 4. IoT sensor network for asset tracking, environmental monitoring

ROI PROJECTION:

- **Cost savings:** Replace 20-30% of guards with remote monitoring (\$2M-\$3M annually)
- **Premium pricing:** Charge 15-20% premium for AI-enhanced service
- **New revenue stream:** Standalone product to non-security clients

Payback: 18 months

Competitive Differentiation First 100% Aboriginal owned remote security monitoring center in Australia, combining cutting-edge technology with Indigenous employment outcomes.

DESIGN

Entity	Digital Opportunity	Tech Stack	Investment	Timeline
Eon Protection	AI Powered remote monitoring, IoT Sensors, predictive analytics	Genetec Security Centre & Custom AI Overlay	\$800,000	12 Months
Gather Hospitality	E-commerce Platform, AI	Shopify plus, NetSuite & Gather	\$600,000	18 Months

GatherX	integration, supply chain visibility	Foundation		
	AI Toolkit expansion and adoption of services	React/ Node.js Huggingface, Stripe, AWS	\$1,500,000	24 Months
IDS	Secure Collaboration, defence grade protection management	Microsoft Teams, Asana Enterprise & DocuSign	\$200,000	9 Months
Gather Films	AI Video Creation, Virtual Production, CMS	Adobe Creative Cloud, LTX Studio, Canva	\$400,000	6 Months
Weitj Ecosystem Consolidation	United CRM, Shared analytics, Cross-entity Intel	Hubspot, Tableau, Zapier	\$350,000	24 Months

PRIORITY #1: EON PROTECTION - AI-ENHANCED REMOTE MONITORING

BUSINESS CASE:

Security industry transitioning from **reactive (guards on-site) to proactive (AI-powered remote surveillance)**. Remote monitoring reduces labor costs by 40-60% while improving incident response

IMPLEMENTATION:

1. Integrate AI video analytics with existing CCTV at client sites
2. Develop custom ML models for mining/infrastructure environments
3. 24/7 monitoring center staffed by Indigenous personnel
4. IoT sensor network for asset tracking, environmental monitoring

ROI PROJECTION:

- **Cost savings:** Replace 20-30% of guards with remote monitoring (\$2M-\$3M annually)
- **Premium pricing:** Charge 15-20% premium for AI-enhanced service
- **New revenue stream:** Standalone product to non-security clients

Payback: 18 months

Competitive Differentiation: First 100% Aboriginal-owned remote security monitoring center in Australia, combining cutting-edge technology with Indigenous employment outcomes.

PRIORITY #2: HOSPITALITY - UNIFIED ECOMMERCE & SUPPLY CHAIN

BUSINESS CASE:

Gather Foods and Gather Spirits currently operate separate retail channels.
Consolidation

- Direct-to-consumer margins (40-50% vs 20-25% wholesale)
- Customer data ownership for personalized marketing
- Subscription models (monthly native ingredient boxes, spirits club)
- Supply chain transparency via Gather Foundation traceability

IMPLEMENTATION:

1. Shopify Plus storefront (\$2,000/month) for e-commerce
2. NetSuite ERP integration for inventory/order management
3. Gather Foundation Traceability System: Blockchain-based provenance tracking
4. AI menu planning tool for corporate catering clients

ROI PROJECTIONS:

- **E-commerce Revenue:** Projected to reach \$1.5 million in Year 1 and \$4.5 million in Year 3.
- **Margin Improvement:** A 25% increase is expected due to disintermediation.
- **Subscription Revenue:** Aiming for 500 subscribers at \$75/month, totaling \$450,000 in Annual Recurring Revenue (ARR).
- **Payback Period:** Expected within 24 months.

PART VI: RISK MATRIX & MITIGATION

RISK	RISK SCORE	IMPACT	MITIGATION
Simultaneous Multi-Sector Execution	48	CRITICAL	Strategic Focus: 2 Priority entities for 2026
Financial contagion?	45	CRITICAL	Empower a CEO for each Entity
Legal/Regulatory Compliance	40	CRITICAL	Seek counsel
Talent Acquisition Gaps	33	HIGH	Engage executive search, offer equity
Key Person Dependency [Founder]	35	CRITICAL	Empower CEO for each entry

AI ANALYSIS AND RECOMMENDATION

IDENTIFIED GAPS:

- **Financial Actuals Unknown:** Revenue projections based on industry benchmarks, not disclosed financials
- **IDS Contract Pipeline:** No visibility into bid pipeline, win rates, or existing contracts
- **Gather Foods Manufacturing Capacity:** Unclear if infrastructure supports 47% Y1 growth
- **GatherX Technical Feasibility:** AI toolkit complexity not validated by technical expert
- **Cultural Governance:** Analysis lacks Indigenous governance expert perspective

CONFIDENCE-WEIGHTED INTEGRATION

Recommendation	Evidence Quality	Strategic Logic	Feasibility	Overall Confidence
Legal Restructure	95%	90%	80%	88%

GatherX Transform	90%	95%	90%	92%
Eon – Gather Foods Cross Sell	80%	90%	985%	83%
Financial Consolidation	75%	90%	85%	83%
Revenue Projections	65%	70%	60%	65%

CONCLUSION: THE PATH TO INTERGENERATIONAL LEGACY

The Weitj Investments ecosystem presents a generational opportunity to establish a self-sustaining model for Indigenous economic empowerment, blending ancient cultural values with modern commercial structures.

THE IMPERATIVE:

Transitioning from a founder-led, single-ABN structure with informal systems and opportunistic growth, to a multi-entity holding company with empowered leadership teams, formalized governance, and strategic capital discipline.

THE STAKES (RISKS OF INACTION):

Without this evolution, the portfolio faces three probable failure modes:

1. **Legal/Financial Contagion:** Risk of the entire portfolio being eliminated.
2. **Execution Overstretch:** Leading to underperformance.
3. **Over-investment:** Depleting capital before validation.

THE OPPORTUNITY (BENEFITS OF REFORM):

With disciplined de-risking, strategic focus, and structural reform, the opportunities include:

- **Achieving AUD \$90 million in revenue by Year 3** (compared to the current \$30 million).
- **Tapping into a \$138 million** market opportunity.
- Establishing **benchmark status** as Australia's leading for-profit, for-purpose Indigenous enterprise model.

FINAL VERDICT: GO, BUT GUARDRAILS

PROCEED WITH CONFIDENCE (STABILIZED AND UPGRADED AREAS):

- Eon Protection: Stabilization and technology upgrade.
- Gather Hospitality Group: Rapid scaling through vertical integration.
- Eon to Gather: Cross-sell pipeline systematization.
- Gather Films: Formalized internal agency model.

PROCEED WITH VALIDATION REQUIRED (AREAS NEEDING FURTHER ASSESSMENT):

- Gather First platform development (prioritizing customer discovery).
- IDS aggressive growth (prioritizing a compliance audit).
- Native Food Farm (implementing a phased pilot, not an immediate \$600,000 investment).

MANDATORY PREREQUISITES:

- Legal restructure to a multi-entity holding company.
- Establishment of an advisory board with domain expertise.
- Consolidated financial reporting.
- Hiring of a General Counsel and Compliance Officer.

CLOSING: THE WEITJ

"This wasn't just barter. This was business."

For 60,000 years, Aboriginal people built trade networks founded on trust, sustainability, and care for Country. Gerry Matera's legacy will be determined not by the ambition of the vision, but by the discipline of its execution.

The "First Entrepreneurs" model thrives when ancient wisdom—patience, long-term thinking, reciprocity—is applied to modern institutional building.

Like the emu, this ecosystem can only walk forward. This report maps the safe path ahead.
