

Shane Hewson / Kismet Finance Group: Pilot Viability Profile

WEB AUDIT: YES ✓

Rationale: Basic site with clear conversion gaps = strong audit-to-pitch bridge. Will impress and validate need for automation.

PILOT VIABILITY: HIGH (8.5/10) 🟢

Quick Profile Summary

Category	Assessment	Score
Decision Authority	Founder—full control	10/10
Pain Point Severity	Time-poor, Perth/Bali split, manual booking	9/10
Budget Capacity	Referral-based revenue model, scalable ROI	7/10
Tech Readiness	Music producer background = tech fluent	8/10
Relationship Strength	Music history = trust foundation	9/10
Use Case Fit	Referral/connector model = perfect for voice AI	10/10
Compliance Risk	Low—no advice, just booking/referral	9/10
Urgency	Moderate—growing but not desperate	7/10
Competition Risk	Low local saturation for this use case	9/10
Measurability	Clear KPIs (bookings, time saved, leads captured)	9/10

OVERALL PILOT SCORE: 8.7/10 🟢🟢🟢

Core Business Intel

Company: Kismet Finance Group

Website: kismetfinancegroup.com.au

Model: Referral/connector service (clients → licensed financial professionals)

Location: Cockburn Central, Perth (Shane splits Perth/Bali)

Team Size: 4-5 (Shane, Dan, Josh, Stuart, Joshua Clark as Director)

Revenue: Referral fees from partner professionals (mortgage brokers, advisors, SMSF specialists)

Why This is a High-Probability Pilot

✓ Strong Fits

1. **Founder-operator** = immediate decision-making, no bureaucracy
2. **Referral model** = voice AI stays ASIC-compliant (no advice given)
3. **High-touch initial engagement** = perfect automation target (qualification calls)
4. **Location-independent aspiration** = Perth/Bali split signals need for 24/7 systems
5. **Music production background** = understands automation/workflow thinking
6. **Existing relationship** = trust already established, lower sales friction
7. **Expressed interest** = Shane already said he's interested when you mentioned voice agents
8. **Scalable business model** = more leads = more revenue, no inventory constraints
9. **Clear pain point** = manual booking, after-hours lead loss, repetitive qualification calls
10. **Measurable outcomes** = easy to track bookings, time saved, lead capture rate

⚠ Moderate Concerns

1. **Budget unknown** = referral revenue can be lumpy; may need low-cost pilot entry
2. **Team coordination** = if Dan/Josh/Stuart also take calls, need multi-calendar integration
3. **Urgency level** = business seems functional; not "hair on fire" desperate (but that's okay—better for thoughtful pilot)

✗ No Major Red Flags

No dealbreakers identified. This is a clean, high-fit opportunity.

Website Audit Strategy

Key Gaps to Highlight (30-min analysis sufficient)

1. **No booking system** → 100% manual scheduling = bottleneck
2. **No contact form** → only phone/email = friction for digital-first prospects
3. **Minimal content** → limited SEO visibility = relying on network/Instagram only
4. **No live chat or AI** → after-hours inquiries go unanswered
5. **Mobile optimization unknown** → likely losing 50%+ of mobile traffic

Audit Deliverable Format

1-page PDF or email summary:

- **3 strengths** (testimonials, clear messaging, local presence)
- **5 critical gaps** (booking, form, SEO, chat, mobile)
- **Impact statement:** "Estimated 25-40% lead loss from after-hours/friction; 10-15 hrs/week manual admin"
- **Bridge to solution:** "Voice AI solves #1, #2, #4 immediately—pilot in 1 week"

Pilot Pitch Positioning

Angle: "Founder Efficiency & Location Independence"

Hook:

"Mate, Kismet's model is genius—you're the air traffic controller for financial connections. But I bet your phone never stops, and with you in Bali half the time, you're probably missing Perth calls. What if an AI handled qualification and booking 24/7?"

Value Prop:

- Capture 100% of after-hours inquiries (no more missed leads)
- Pre-qualify before Shane/team engages (only talk to ready-to-refer prospects)
- Free up 10-15 hrs/week for high-value activities (deal sourcing, partner relationships)
- Enable true location independence (run Kismet from anywhere)

Pilot Scope:

- 4-6 weeks
- Voice AI on primary inbound line (or dedicated inquiry line)
- Handles: Greeting, qualification questions, booking into calendar, confirmation reminders
- Human handoff for complex/urgent queries
- Cost: \$300-500 pilot budget

Success Metrics:

- $\geq 50\%$ of calls handled by AI without human intervention
- $\geq 10\%$ increase in booked consultations (capturing after-hours leads)
- ≥ 10 hours/week time savings for Shane
- $\geq 4/5$ client satisfaction score

Key Discovery Questions for Initial Call

- 1. How many inbound inquiries/week?
- 2. What % are you handling vs. Dan/Josh/Stuart?
- 3. When you're in Bali, who covers Perth calls?
- 4. Most common inquiry type? (Investment property, SMSF, debt consolidation?)
- 5. How long does typical first call take?
- 6. Calendar system? (Google, Outlook, CRM?)
- 7. What happens to after-hours calls now?
- 8. If you could automate one thing, what would it be?

Risk Assessment

Risk	Likelihood	Mitigation
Budget objection	Low-Med	Start with low-cost pilot (\$300-500); show ROI math (1-2 extra referrals pays for itself)
Team buy-in needed	Low	Pilot just Shane's line first; expand to team if successful
ASIC compliance concern	Low	Voice AI scripts stay in referral/booking territory—no advice given
Tech integration friction	Low	Most voice platforms integrate easily with Google/Outlook calendars
Client trust in AI	Med	Use Australian voice, transparent disclosure ("Shane's AI assistant"), seamless human handoff
Urgency/prioritization	Med	Shane's busy but not desperate; may need to create urgency (competitive advantage angle)

Overall Risk Level: Low

Recommended Next Steps

This Week (Oct 26-Nov 1)

- 1. **Conduct 30-min website audit** (use framework from earlier analysis)
- 2. **Create 1-page audit summary** (strengths, gaps, impact, solution bridge)
- 3. **Reach out to Shane:** "Mate, been thinking about our chat. Did quick analysis of Kismet's setup—found some interesting opportunities. Got 20 min this week?"

Week of Nov 4-8 (When You Said You'd Contact)

4. **Discovery call with Shane** (use questions above)
5. **Deliver audit insights** (5 min, keep concise)
6. **Pitch pilot** (10 min, use positioning above)
7. **Handle objections** (5 min)
8. **Close on next step**: Demo setup call, or "think about it / follow up next week"

Competitive Comparison (If Building Portfolio)

If you're evaluating multiple pilot candidates, here's how Shane ranks:

Top Tier Indicators (Shane has these):

- ✓ Founder with decision authority
- ✓ Clear, measurable pain point
- ✓ Existing relationship/trust
- ✓ Business model naturally fits voice AI
- ✓ Expressed prior interest
- ✓ Low compliance risk

Mid-Tier Indicators (Consider for other prospects):

- Budget confirmed upfront
- "Hair on fire" urgency (desperate for solution)
- Large existing lead volume (proof of demand)

Red Flags (Shane has NONE of these):

- ✗ Needs approval from boss/board
- ✗ Heavily regulated vertical (direct advice)
- ✗ No clear pain point / just "nice to have"
- ✗ Cold relationship / no trust
- ✗ Prior bad experience with tech vendors

FINAL RECOMMENDATION

YES—Prioritize Shane as Tier 1 Pilot Candidate ☐

Why:

- High viability score (8.7/10)
- Low risk, high trust, clear ROI path

- Perfect use case fit (referral model = AI-friendly)
- Music history = relationship equity to leverage
- Website audit creates natural pitch entry point
- Expressed interest = warm lead, not cold outreach

Action: Schedule call this week. Lead with audit. Pitch pilot. Aim for trial by mid-November.

Likelihood of Securing Pilot: 70-80% (assuming strong execution on pitch)

One-Line Summary for Your Portfolio

Shane Hewson / Kismet Finance Group: Perth founder, referral-based property/finance connector, expressed voice agent interest, music production background (tech-fluent), Perth/Bali split (location independence need), basic website (audit opportunity), 4-person team, clear booking/qualification bottleneck. **Pilot Viability: HIGH (8.7/10)** 📌
