

From "Messy Spreadsheet" To AI Powerhouse

We aren't just fixing your CRM. We are building a secure, scalable **Operating System** that automates your backend today, and positions Kismet to sell high-margin AI Voice Agents to your clients tomorrow.

The Expansion Model: Selling "Good AI"

Why stop at loans? Your self-employed clients are drowning in admin. We integrate "AI Consulting" into your sales process. You refer them to Good AI for Voice Agents; we build it, you get paid.

New Revenue Stream

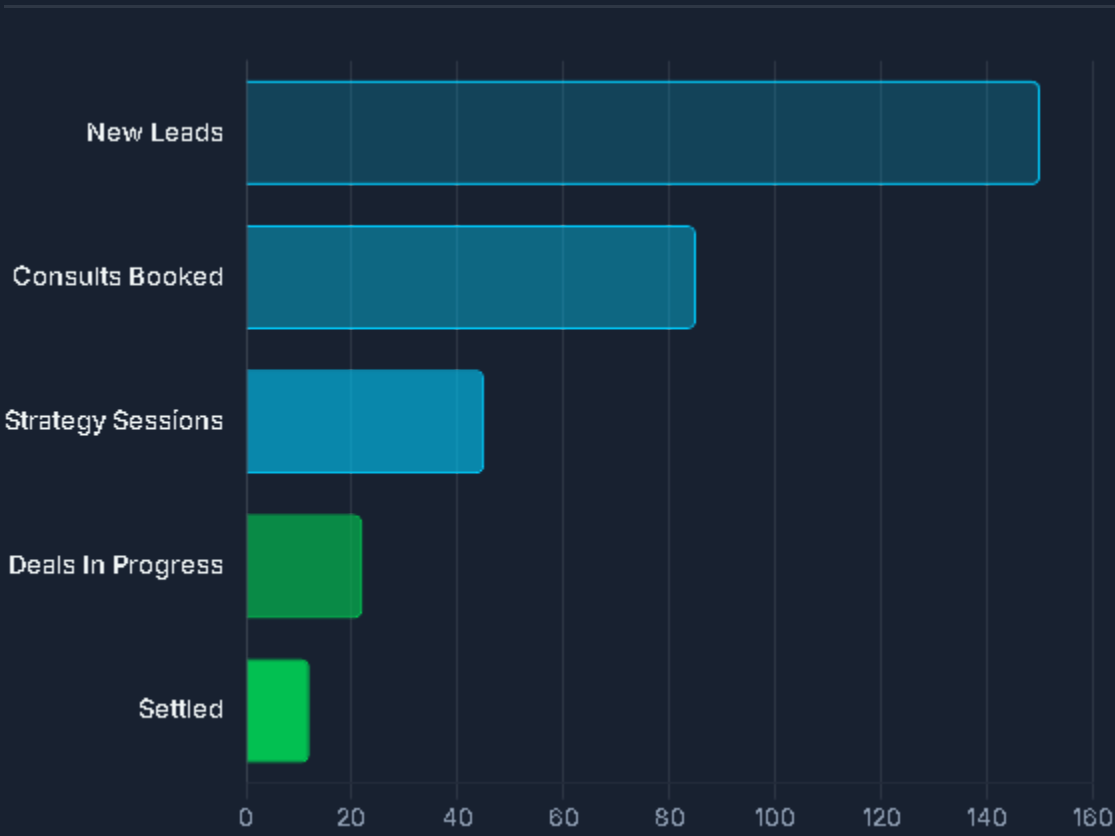

The "Sales Nervous System"

Before we can sell AI, we must use AI. We are replacing the chaos of "random spreadsheets" with a structured, Google-native architecture. This creates a "Single Source of Truth" that is secure, auditable, and ready for high-scale automation.

- **Clean Data Structure:** Leads, Contacts, and Deals are linked. No duplicates, no "fat finger" errors.
- **Agent-Ready:** The database is structured so that future AI agents can read/write to it without hallucinating.
- **Team UI (Softtr):** Reps see a beautiful app, not a spreadsheet. They can't break the backend code.

Pipeline Health: Where is the money stuck?

The "Zero-Touch" Automations

We automate the boring stuff so your reps can focus on closing. This is the exact same "Agentic Workflow" logic we will eventually sell to your clients.

Door-Knock Capture

Rep fills simplified mobile form.

- > Create Lead (Sheet)
- > Send "Thanks" SMS
- > Assign Task to Josh

Missed Call Savior

Never lose a lead to voicemail.

- > Detect Missed Call
- > Instant SMS Text-Back
- > Log in CRM as "Urgent"

No-Show Terminator

Automated reminders increase show rates.

- > 24h Email Reminder
- > 2h SMS Nudge
- > Post-meeting Follow-up
