

KISMET BUSINESS OS: THE STRATEGIC BLUEPRINT (SOS EDITION)

To: Shane & Leadership Team **From:** Good AI Australia **Date:** January 19, 2026 **Subject:** The "Truth, Flow & Compliance" Architecture (Grant-Ready)

1. THE MISSION (STRATEGIC OPERATIONAL SHIFT)

We are executing a dual mandate: building a "Truth Engine" for internal efficiency and a "Regulatory Fortress" for external compliance.

- **Shane's Truth (Risk Mitigation):** You can sit anywhere in the world and see the exact state of the business—revenue, activity, and compliance gaps—in real-time. We are solving the "**Silence Gap**" (the dormancy risk in the Muriel Court/Antini portfolios) by automating transparency.
- **Consultant's Flow (Asset Accretion):** The technology melts away. They remain "Conversation-First, Screen-Second," while the system actively converts static records into high-velocity assets.

2. THE LAWS (NON-NEGOTIABLES)

We are not building features; we are building guardrails. These are the laws of the system, aligned with Grant Prerequisites:

The "Melted Butter" Rule (< 60 Seconds)

Post-appointment admin must feel effortless to ensure 100% adoption.

- **The Standard:** If a rep takes longer than 60 seconds to log an outcome, the system is broken.
- **The Flow:** Tap Outcome → Record Voice Note → Confirm Next Action. Done.

The "Ghost" Ban (Compliance Hardening)

- **The Law:** An appointment marked "Sat" with no notes triggers an immediate escalation.
- **The Logic:** "No notes = It didn't happen." We enforce accountability automatically, ensuring every interaction is audit-ready for future WA PRIS Act requirements.

The "Cockpit" Law (System of Record)

- **The Law:** Notion is the operational cockpit, backed by **Google BigQuery** for scalable analytics.
- **The Logic:** No rogue spreadsheets. No data islands. Everything flows back to a single, WORM-compliant source of truth.

3. THE DATA PHILOSOPHY (FIXING THE MESS)

We are moving from a "List of Names" to a "Household View" to bridge the communication void.

- **The Problem:** Currently, "John & Jenny" are often one line item. If John calls, you don't know Jenny is his wife. Dormant clients in the Muriel Court portfolio feel "ignored."
- **The Fix:**
 1. **People (Atomic):** John is a record. Jenny is a record. (Birthdays live here).
 2. **Household (Molecular):** The "Smith Family" is the container. (Deals live here).
 3. **Entities (Legal):** The "Smith Family Trust" is linked here.
- **Result:** You see the *entire* web of influence for a client in one glance, allowing for "Surgical OSINT" re-engagement strategies.

4. VISUALIZING THE "FIELD EXPERIENCE"

We are rejecting standard spreadsheets for the field. We are deploying a custom "Kismet Interface" for tablets.

Visual A: The "Door Knock" Mode (No Maps, Just Action)

- **What they see:** A clean, high-contrast "Hit List" of their assigned streets.
- **The Action:** Tap "New Knock" → System auto-detects address via GPS (Text Only).
- **The Speed:** Reps can log a "Not Home" in 3 seconds while walking to the next door without waiting for a map to load.

VISUALUIMOCKUP

- **Screen:** Dark Mode (Battery Saver).
- **Content:** A simple, large-text list of street names: "14 Smith St", "16 Smith St".
- **Controls:** A massive, floating "New Knock" button in Kismet Gold at the bottom right. No map pins, no clutter.

Visual B: The "Showtime" Mode (Presentation)

- **The Problem:** Fumbling for PDFs looks amateur and erodes trust.
- **The Fix:** A "Kiosk Mode" for the sales deck.
- **The Experience:** Rep taps ONE button. The interface locks. The Pitch Deck loads full screen. No notifications, no admin clutter. Just the show.
- **The Control:** Marketing updates the deck in Notion, and every rep's tablet updates instantly (Version Control).

VISUALUIMOCKUP

- **Screen:** Full-screen immersive view. No URL bar, no battery icon, no navigation tabs.
- **Content:** The Kismet "Golden Path" slide deck (high resolution).

- **Controls:** Invisible swipe gestures. A discrete "X" button hidden in the top corner (requires long-press to exit) so clients can't accidentally close it.

Visual C: The "Admin" Mode (Melted Butter)

- **What they see:** A minimal "Discovery Form" that appears *only* after the presentation.
- **The Action:** They tap "Sat" → The app prompts "Record Voice Note."
- **The Magic:** They speak for 45 seconds. The AI transcribes it, formats it into your compliance template, and saves it to the Notion Household.

VISUALUIMOCKUP

- **Screen:** Clean White Card overlaid on the dark background.
- **Content:** Three massive block buttons taking up 50% of the screen:

Green : SAT

Red : NOSHOW

Yellow : RESCHED

- **Interaction:** Tapping Green instantly reveals a large "Microphone" icon pulsing, ready to record.

5. BRANDING & PROFESSIONALISM

The "In-House" Experience

We are separating "Internal Function" from "External Polish" to restore trust.

1. **Client-Facing Forms:** When a rep hands a tablet to a client (e.g., Assessment Form), it will **never** look like a database. It will be a fully branded, high-end web form with the Kismet logo, colors, and font.
2. **Rep-Facing Tools:** Functional, fast, and high-contrast for outdoor visibility.
3. **The "Presenter" Mode:** We hide internal jargon/admin fields during presentations so the client only sees value.

6. GRANT READINESS & COMPLIANCE

Aligning Technical Architecture with Funding Requirements

This build is designed to meet the strict criteria of Western Australian Digital Grants.

6.1 Data Sovereignty (The Vault)

- **Protocol:** All Client PII is stored within Google Workspace (Australia Region).
- **Archival:** Google Vault is deployed for WORM-compliant (Write Once, Read Many) storage, meeting FINRA/SEC standards for financial record keeping.

6.2 The "Value Accretion" Engine

- **The Narrative:** We use AI agents to reframe project delays (Muriel Court) as "Forced Appreciation Periods."
- **The Mechanism:** Automated "Manager's Updates" sent via n8n providing transparent infrastructure progress (Metronet updates) to keep dormant clients engaged.
- **Trigger Logic (Sample):** IF `current_date > '2024-07-01'` AND `project == 'Muriel Court'` THEN `initiate_value_accretion_sequence` PARAMETERS: { "timeline_delta": "16_months", "infrastructure_hook": "Cockburn_Central_Metronet_Expansion" }

6.3 Auditability (The "Glass Box")

- **Requirement:** Every interaction (Voice Note, DocuSign, Email) is logged in Notion with a timestamp and "Actor ID."
- **Outcome:** A fully auditable trail of advice and engagement, protecting Kismet against future regulatory shifts.
